Tip You can obtain the product key from your browser's menu bar. For example, you can open a web browser and right-click anywhere on the page and then select (properties), or select (view source). In the upper-right corner of the web browser, the text product key is the item you need. The product key is on a separate line from the URL of the web page. You can also remove the VBA engine from the network using Autodesk's configuration utility. Open Configuration Utility. When you enter the network, select the \_Confidential Network\_ option and click the (gear) button. On the Options tab, click the (gear) button under Users and Groups. Under Disable VBA, enter 0 and click (apply). # Solving common issues If you have issues installing the software, see the following suggestions for troubleshooting. ## AutoCAD on Windows 7 and 82157476af
